Feb 22, 61 JFL-K

In addition, I believe we should make use of
diplomatic channels for just informal discussion of
these questions, not in the sense of negotiations (since
I am sure that we both recognize the interests
of other countries are deeply involved in these
issues), but rather as a mechanism of communication
which should, insofar as is possible, help to
eliminate misunderstandings and unnecessary
divergence, however great the basic differences may be.

I hope it will be possible, before too long, for us
to meet personally for an informal exchange of views
regard to some of these matters.

(Announced May 12, after Cuban exchange of letters & talks with
Thompson; accepts US proposed date of June 2-4 for talks)
Laos, China, Berlin (no hint of hard line).

(now failed)

Feb 17, 62 (Conf. to Dec 31) L. letter, and message through
JSC to K (and Jan 30 talk with Andropov) (in addition to this)

... further pressure on the West in Berlin only
increases the pressure with France & the Fed Rep to
build a greater military force, to secure an independent
national capability and to adopt a more rigid attitude on
any accommodation.

... I have written frankly of these matters to you because
in the hope that you will respond in kind. I can assure
you that I will continue to hold in the utmost secrecy
any message or proposal sent through this channel, for I
have always regarded it as a private and confidential
means of communication, without all of the pressures which
public communications bring to any question of this kind.

I realize that such an exchange, if successful, would
represent a considerable departure from normal diplomacy
[?] But, surely we both recognize that our
situation requires new methods of procedure.

How unusual is demand? What are efforts?

Did it suggest to K, JFK intelligences & ability to keep secret?

June 5, 62 JFK (refers to K's talks with Salinger)

I am glad to learn again from Mr. Salinger that

Ans. DeBrynn has your confidence in unusual measure

[Ans. under decision made to

tell JFK after election.]

Summit Conference of 1955 and the same deal

Chas. Bell 10/24/62 9:40

C: Adlai is kicking like a steer over this statement.

... He wants to indicate some softening of our position.

(Letter to W.A. C. Plant)

Pres. Bell 10/24 10:45

... (to letter:) It seems to me that this record will be published.

my two letters to him and his two to me.

10/24/62 3:25 pm Bundy - Ball: Jk 6 next

interesting ships have turned back. Starting a study session

Bundy & Ball only 2 told so far.

Chubb - Ball 5:20 10/24/62 Congress getting impression invasion

imminent. Ball: No. ^{So} operation more political than military.

If want to see what can be done on a political level,

first as we do.

(Brandon had just been in Cuba).

10/24/62: Bundy - Ball 8:05, 8:25

(Paul was anti-tanker interception. McNamara wants to intercept
tanker & to turn him back; Ball wants; Bundy?

Basic orders to Navy: not enforcing "non-discriminatory blockade,"
take anything that comes, but: a blockade with instructions from McN
as to which ship to enforce it on.

(That evening, Pres gave Congress impression we were not going to stop
tankers. "Mean" so POL blockade, but ships might be searched.

are threatening us with various misfortunes, but I
think they are more clever in their things than in the
words because only Germans can sow distrust with
war but suicides are always sincere people. I, for
myself, consider that our counterparts with whom we
conduct conversation are mentally normal people and
can realistically evaluate and understand what it
would mean to attack the USSR or another country.

I believe that we, the men treated with great
trust and responsibility by our peoples, should understand
all this correctly and should oppose operations which
sometimes push us to go the wrong way. To say it
straightly: it is not frightening each other with words.
We have seen enough of frightening. You, Mr. Pres., participated!
in WWII, and I participated not only in that war.
Both of us are aware what war means and as the leaders
of states we know what military means as seen at the

disposal of the USSR & the USA. Let us not count
by pieces and let us see who has fewer modern
means of mass destruction. Each of our countries has
already stock-piled more than enough means to
inflict an irreparable devastating blow.

The SU intends to conclude a German peace treaty

(refers to VPK action of international organ on access
to Berlin, revised by Adyphatzei from 30).

... possible only on condition that
troops now stationed there are withdrawn; and that
symbolic contingents of USSR neutral troops for 3-5 years.

(refers to someone's confidential conversation with G. G. G.
... in good &
since no progress on Berlin, VPK considers it necessary to find
the way within the shortest achievement of an agreement with
the SU is possible, this document is also, & first of all
the test case; said that VPK would like to have a summit meeting
it always willing.]

Bob will soon arrive - He enjoys the full confidence
of the SG and my full confidence. Whenever you need
to convey something to me in a confidential way he will
be able to transmit this to me personally.

(contin) Our proposal is a concession to you. We do not
want to create difficulties for you, Mr. Piro, and your
country because in your country there are hot-heads, may be.
There are some may you others too. These questions are
currently understood in our country and by our others.

[and negotiation; I will have
blackmailed VFR with this, with others.]

Sept 4, 62 Informal Comm from JFK - JFK.

(re JFK-Mac statement of Aug 27)

It was immediately upon an agreement on the cessation of nuclear tests in the atmosphere, outer space and under water but at the same time let us agree that w.r.t. underground tests negotiations will go on with me to reach an agreement on the underground tests as well.

.... (suggests moratorium during negotiations).

Sept 28, 62 L to JFK re Nuclear testing (in WH)

+ Cuba

Oct 3, 62 JFK-K

I am giving careful consideration to your communication of Sept. 28, and I am glad that we can continue to use this channel as a means of communicating privately and frankly.

I shall want to commit separately on other aspects
of your letter, but because of the limited discussion in
the UN I want you to have your views promptly on the
subject of nuclear testing. I believe we are nearer to
agreement on this issue than on others, and I believe that
we should keep at it to see if we cannot promptly
reach the understanding which the world wants & needs.

Inf. to K's ref to recent Pugwash conf, which has
you suggest that the agreement we can now
promptly make on cessation of tests in the atmosphere,
in outer space & under water be accompanied by a
5 year moratorium on underground explosions. But
surely it will not take 5 years to reach agreement — if agreement
is ever to be reached — on banning underground tests.
... (inasmuch, the treaty has

So I continue to think that we are within striking
distance of a treaty banning nuclear tests in the atmosphere, outer

up and under water. I believe we should try to
work out such an agreement in time to meet the
target day of Jan 1, 1963.

manilla, vegetable or underground tests. To agree on
the moderate number of on-site inspection necessary to
supplement black boxes. ^{Dec 19} Later K proposed 2-3; we
proposed 8; K said none, because not needed and
blame drawn for big inspectors, covering 500 sqm each, flying
being, not only "symbolic" investigations would be splashed by
spies. /

Dec 28, 62 JFK-K (public) refers to K-VFK Dec 19.

W.R.L. number of on-site inspections, appears to have been

some misunderstanding. Your impression seems to be that
(allegedly on Oct 30, in NY)

And Dean told Kington that the US might be prepared

to accept an annual number of on-site inspections between 2 & 4.

And Dean advised me that the only number which he

mentioned in his discussions with Kington was between 8 & 10.

W.R.L.

strategic reserves of POC were stored on island to
accommodate military equipment; one area seen on 11 Nov 4...

(Not seen before? Would this have frustrated blockade?)

Prob C-C birds: appeared in House 23 Oct, Scrabble 23 Oct.

First info on use of deception by Sovs. 13 Nov. during "no
run or airfields (without cockpit). One during still being
assembled.

42 4/5-2/5 seen on 16 Dec; by 37 seen earlier (17 Oct),
short certain all there by 17 Oct; where had the other 3
been?

Benedict's intercept discovered 25 Oct. By 14 Nov, all of
4 regiments around test forces: will over 4,000 troops.

Earlier est.: about 1200 (4 reg. brns).

All established since July. (?)

Each group at least 1000-1500, perhaps 2500

i.e. Total: 4000-10,000.

It is necessary to determine types of equipment, count.

Constructing 10,000 ft. runway, underground storage & hangars at 4 reg-

menting Sovs planned to have USA bombers and to hit

the new town. [Subsonic.]

At least one ship with II-28's was missed.

Recovery of II-28 crates was scheduled for recon mission of
14-15 Oct?

8 Oct. unconfirmed reports of II-28 crates arriving, where?

Est. of photos of 28 Sept published 10 Oct.

Cruise missile: spotted 29 Aug; reported as probable cruise
missile, 7 Sept; confirmed 17 Sept.

Deployment might continue, to fill gaps.

Komarov first arrival 14 Aug.

1416-21 first seen 5 Sept. First SI instruction 13 Oct.

Cruise missiles first seen 5 Nov.

How much time had Adm/Pittell figured would
be available between time missiles might be identified
and time they could be fired?

7 ships contacted by Moscow in individual cipher messages,
6 hours after Pres. speech. Tinned beef.

Encl in Cuba 7-8 Sept; Oncoming 29 Aug, 8-10 Sept.

[Possible lie by K that miss were in Cuba, so as
to reassure US that he had removed them (K to Ambr.
Rebarts, 12 Nov.?)

3 ships WAS THIS USED ON SHIPS TO CUBA? (Tanker)
increasing of "ball effect": increase in readings of neutron
flux in vicinity of hull of a ship. Neutron detectors.
(not high reading from land). (False alarm possible?)

New effect; not completely understood.
undermined detectors; rainstorm. high voltage.

[Suppose JFK had to justify action to public, thus -
without releasing photos? What then might he have
thought JFK would be reluctant to release? Was he?
Might he have been?]]

No high flights suitable for search after 23 Oct? (then 23-24)
(No, no new sites detected. Warheads; IRBMs.)

33 MRBMs identified by 4 Nov; on 4 Nov, Kuznetsov
outlined 41 to McCloy.

Thought possible at time that a few IRBMs did arrive
and remained undetected; but none seen leaving, whereas many
MRBMs were detected detected; assumed, therefore, that no IRBMs
SA-2 33.7 ft x 2 had been brought. Even if IRBMs hidden,
SA-3 54' ^{no answer} sites take a long time to construct,
SA-4 65' ^{no answer: 131} could be detected.

[Consider political implications of 'evidence' that missiles
had remained in Cuba! McN's Hostages.]

5th order from Turkey presented

McC before Madson Comm Feb 5 63

Chine: C.A. official position is always the agreed intell est.
published in Bull. ...
worked out with other intell agencies. When I advise McC
of what our own analysts' view is, we sometimes advise
him that we think the official ests are on the low or high
side. as his report to Pres in August indicated, we
were advising him throughout that period that we
thought the official ests were considerably in error on
the low side, that in time we would gather intell which
would prove that the figures were larger.
our unofficial, in-house view.

McC I said yesterday it is our judgment ^{now} that the first
offensive missiles arrived in Cuba about Sept 8, and the reports
on those we received ^(in Wash) about Sept 21st. Those reports were
refugee & agent reports and had to be verified. The
orders went out for the flight to verify them on Oct 4, but
whether intell was even able to (tell Oct 14).

Effect of Secrecy: "Finding out" is postponed for both sides till just before
until action. e.g. Actor doesn't learn, from responses to his explorations, handcuffs, etc.
1) reaction to his actions will be hypothesis.

[Consider general effects of discovering sooner;
i.e., imagining / gaming / planning sooner?

Effects of gaming in reducing surprise? All good?

(or, do they reduce chance of ever taking violent
action; as well as chance of paralysis? Balance?

2) Hypothetical experiment: Shift the info flows
and planning flows relative to the
underlying event / energy action / decision flows.

Any situation in which action ~~is~~ ^{is planned, prepared} immediately
must be considered to prevent possible major loss
arises, the question: Why wasn't action taken
already? Why is need seen just now, or such a
short deadline? (The question assumes that
the flow of events creating the problem, the challenge to
action, ^{was} not "in fact" discontinuous, though our
knowledge or awareness of this or the implications might be;
Was there not early "indication" of this need

(Crisis: an urgent "problem", not merely an urgent need to act, to select (~~with~~ the one obviously appropriate act).)

Problem: Since is difficult, non-obvious; in fact, set of alternatives, goals, relevant contingencies, etc. must be defined; search + invention, calculation + evaluation are needed.

Crisis: a "problem" with a ^{short} deadline.

Can be graded in terms of importance (gravity, goals, risks involved); difficulty; novelty;

Crisis to expect in pattern of post):

1) U-2s against SAMs (whole issue of identifying whether to send them. How much has/will China even change this "dialog"? How similar is current debate?

Note switch on use of drones.

2) Recon vs. protests and threats.

|| 3) Appearance of ~~SA-2s~~ SA-2s in North Vietnam

[As in Pearl Harbor: available info fell into a coherent pattern, ^{and on} which was exactly in line with one of the major hypotheses predicted earlier (and in Cuba, practical reality): ~~Data~~

X = true hyp (low initial prob); Y = favorite Z = other

Given data (which does not support X but doesn't strongly disprove it), prob(Z) goes down almost to 0, prob(Y) goes up almost to 1 [subject only to reversal of many decisions/actions] prob(X) goes down slightly relative to prob(Y) : so former relationship of X to Y is preserved (say, 10:1)

(If they had

say; Cuba;

But if lack of positive evidence for X (vs. Y) is taken as highly significant (e.g. coverage is overestimated; enemy activity underestimated; enemy deception underestimated; enemy lead-time to move from Y to X overestimated; X and Y regarded as exhaustive or competitive) then ^{prob X} ~~prob Y~~ goes down sharply: prob X may even decline.

Army commit at end-August: military buildup and
extraordinary low bloc econ commitments amount to the most
extensive campaign to bolster a non-bloc country ever
undertaken by USSR."

~~After~~ "Inched on

On Feb 6, Ball accused by ^{report of} having understated

to Kitchin ^{on Oct 3}, extent of info re "evidence"

^{in 6-10-44} p. 894: "We have no evidence that there are any ^{SSA}."

in Cuba capable of firing to a greater range (than 30 miles)

[Ball's statement prepared by Salomon, checked by McN
by telephone, on basis of C/B and D/S]

McN. Ball said, "by implication" he did not have
evidence ... a fair statement at the time.

McN. agent report was important not because, by itself, it
gave great evidence that there were ballistic issues, but

Ford: strange that second highest officer in State
would not know; serious that he should understate
irresponsible, shameful (McN's language about Congress)

On Sept 28, Bill Bradley said to Nelson Conn. Q: "Does the
military have any intell. indicating the existence of nuclear
ball. miss. in Cuba?" "No sir, it does not."

Connell. 2 agent reports. One signif. because it enabled us
to pinpoint the location involved.

One more signif. than others a refugee report.

3. SAMS in Prison and Base that did not seem to make any sense
in relation to a particular military location involved. Elsewhere,
a logical relation.

McN: largely through analysis that this suspicion arose.

It was not based on a report that the suspicion

arose [i.e. a piece confirming hypothesis]. It

had had thousands of reports like this (?)

What gradually formed in his mind was a hypothesis
based on the integration of 3 or 4 pieces of evidence (one
plate analysis of 34M. sites)

... a hypothesis that had been formulated previously
and had been tested previously and found to be in error
in respect to other locations. His only action here
quite properly ... was to test that hypo,

Sec Ball neither had nor had any reason to know of
this info. Connally: he did not ... Sec State did

not. Certainly did not have benefit of the rationalization
we were undergoing, because we wanted to put it to the test
to determine whether we had anything adequately substantiated
to report.

McN: ^{imitation} All of the suspicions of our intell. analysts are not
submitted to me, for example daily. I have a hand enough

the reading the intell. reports that do come up ... would
have been inappropriate to distribute all these suspicions.

I feel strongly that there was no reason why (Ball)
should have known at that time of this kind of suspicion.
There are hundreds of suspicions of this kind today in
some areas of the world that are very important to us.
99% of the suspicions prove wrong.

Ford — But they were suggestive enough.
McK... to designate the suspect area for the next
(?) U-2 reconnaissance.

[i.e. because specific location designated, possible to
make a very small adjustment in US actions: affecting track
of flight scheduled for other purpose. This did not reveal
much weight given to evidence. Why gave it weight?]

as sub security base: existence of such a base would be highly
desirable.

U-2 shootdown, April 63

502/8 talk

Exploitation of contingencies only politically possible
means for taking action steps to apply US power to reduce
Castro power & prestige influence. Political & power realities,
including USSR ability to antagonize react in Berlin or
elsewhere, preclude arbitrary and unilateral action,
without provocation, to eliminate Castro.

USSR would be most likely to ^{official} ~~warn~~ first. Unprovoked attack
might be feature of control; provide for a minimum response,
officially; hold Castro responsible, initially

[USS objected to above?]

8. When I left for Office, I had been greatly concerned by helming indications (?) that USSR was introducing offensive weapons (I-155?) into Cuba, I had tried to warn him that unless this situation was quickly reversed, this country would have no alternative but to make the first kind of response.
Now 15 Bowles - Debyon reason (15th)

Bowles added it was my assumption that the Ans had not personally known that offensive weapons were being placed there; he seemed pleased to be the bit off the hook.

[Even without being asked by K, Deb must have been sending warnings based on private conversation, though, if K thought Adam already knew ... e.g. by Oct 15 Bowles - Deb talk...]

Bowles: basic situation could only be compared to a US military pact with Finland, followed by an attempt by us to line the Finnish-Sov border with missiles aimed at Sov cities. In such circumstances I was sure that the Sov reaction would not differ greatly from our own.

[Would Sov intell predict or discover this?]
What Sov intell failures could we predict?

Whitman: C/A roll: continuous to intell. comm.

Sturges (proposed?) letter to K on Wednesday (?):

Please understand Mr. Chairman that we are prepared to discuss the basis in the context of the general disarmament treaty. This we have been committed to for four years. --"

I tried to make clear I was in favor of using the phrase keeping marching.

Call
[Ball, Helphout, Johnson deliberately (?) left off Earlhalt - Miss
list of Explanations]. (11 men on "coordinating committee") purge Sturges.

[Ridge? Johnson? Brown Smith?]

On Saturday (?) and Oval Room: solemn agreement that nobody there would ever disclose the views of anybody else or his own.

Fidelity: proposed head of article: 5 war-mongers who in disagreement with the Pres. wanted to invade & mis-state

Ball: ^{also} story story as though the real heroes were the jugs who were plain off base.

24 Oct. ^{Widen} Cleveland: recommends encouraging broadening
of discussion to include Turkish & Italian base problems

Sec: NS

Resolution might be put forward by Irish and/or other
approp. nationals:

"Defanging Resolution":

Security Council: noting

Requests the nuclear powers: a. to halt the delivery of
of further long range nuclear delivery vehicles (including
MRBM, IRBM, ICBM) to foreign states outside the territory of
the nuclear powers

b. to render inoperable all such weapons already located
in such foreign states, and

c. to arrange by agreement among them to remove such
weapons from the territories of such foreign states at the
earliest possible time.

Restow: Missile - Cuba fell in category of "unusual" few actions -
with higher degree of risk. Other "unusual" actions which
intell comm had failed to predict: 2) phase of low warrent
after war (?); 3) attack on South Korea; 4) development
of 100 MT bomb. [renewal of testing?]

1) In case of Korea + Cuba, Moscow had also failed
to predict our reaction [Was our reaction "unusual"?]

2) Certain possible "unusual" actions had not materialized:
e.g. full-scale exploitation of the ICBM potential.

(Unusual? We did predict -)

Cuba: prior predictions, testing opportunity \rightarrow "wild thing?"

See New York 1453 of Oct 24, our 1085 of Oct 25,

Djakarta 742 of Oct 25.

McC I ~~report~~ myself had the same concern that Keating did
and expressed it long before he did and before my
departure on Aug 23 I repeatedly expressed concern but I
had no hand intill to support it.

~~Admission on agent reports...~~ & indulging it was a
philosophy which I have expressed that our people felt that
the Sars would not move into a confrontation of the type they had

Baltonhall talked to Carter on Oct 12 on Keating charges.

9:15
Singles to Sec's Staff meeting Oct 3, 1963, morning of testimony ^{Ball} brief
C-4 item distributed day before now considered signed by intell comm.

On 19 Sept large intercontinental rockets, more than
20 meters long, were unloaded in Maribel, near the Rio Province.
The rockets were on large trailers which they were unloaded from
the ship.

Headquarters Comments: It is more likely that source observed

SA-2 missiles being offloaded.

Brent, Taddemter

March 6 67 Press Conf:

Q. many claims ... is that your CI chief, MC actually
knew before Oct 14 that the Sows had planted offensive
missiles in Cuba.

[Most significant evidence to Sowers was lack of more evidence

[Analyze a) intell comm eval. of evidence

& expectation of warning, time of install.,

adequacy of coverage, Saw secrecy

(Was Saw "disruption" reported to intell comm?)

Did they know?)

c) intell comm prior probes

d) basis for:

1) non flights, targeting

2) dissem in intell comm

3) Press public statements

4) queries, private statements to Sows

5 June 64

CA / Sov. world would not regard US demand for
return of all Sov military specialists as excessive or
unindictable. (Note to officers) This would render SAMs &
cruise missiles inoperable (no training of Cubans) &
some of KOMARS & MIG-21s.

[We didn't realize the size of Sov forces]
